

Cookie Policy

Introduction

This site uses cookies and similar technologies for various purposes. Cookies are small data files that a website sends to the browser you are using in order to store it during your visit.

How this site uses cookies

The following cookies are used on this site:

Type of Cookie	Description
Analytics	These cookies help us to enhance this website over time by allowing us to see how users engage with different portions of the site and how they interact with it over time.
Authentication	If you log in to our website, these cookies allow us to remember who you are so that we can give you access to pages specific to you, such as your account pages. Your visit to the site is more secure with these cookies. These cookies aid in the security of your visit to the site.
Session	Cookies are designed to ensure that your visit to the website is as smooth as possible. They perform the following functions: • They identify your device as you use the website, so you aren't treated as a new visitor each time you visit another section. • Make sure that each of the servers that power the website serves an equal number of users, for a smooth, fast, and responsible browsing experience for everyone;

How to reject and delete them

Web browsers accept cookies by default. However, you may refuse or block cookies at any time and delete all cookies stored on your device should you choose to do so. By clicking the "help" button on your browser's menu, or by visiting www.allaboutcookies.org, you will be able to find out how to do this for your browser.

Microsoft Chrome, for example, allows you to delete cookies by:

- Selecting "Settings"
- Clicking on "Security and Privacy"
- Selecting "clear browsing history"

Alternatives to block, accept or require notification for the use of cookies are found under:

Under: "Settings/security and Privacy/cookies and other site data" you can allow, block, or clear notifications.

However, if you choose to block cookies, you may be unable to access certain elements of this website.

Tracking technologies that our marketing emails use

We use a variety of email services to deliver emails. Each service uses tracking technologies. By monitoring whether our emails are opened, and which links are clicked, we can determine what subjects are most interesting to our readers. We will then use this information to improve our emails and services to you.

In order to prevent us from using these technologies, we suggest that you do not enable images when viewing our emails. To put it another way, only look at the email's plain text.

If you do not want us to use tracking technologies, we won't be able to use your email viewing behaviour to determine your preferences so we can better tailor the emails we send to you over time. When creating further emails, we will not be able to incorporate your email content preferences. In addition, we will not be able to take into account your preferences when making improvements to our services.

If you have any questions, please contact us.
